Program Benefits

Our program is unique by design. The hands-on training and support you'll receive will prepare you to pass your certification exams and accelerate your career.

Online, asynchronous courses allow flexibility for individuals.

Authorized Training Partners for all certification technologies.

Project-based learning environment to gain real-world experience.

Courses designed and led by experienced, tech pros.

Certification Course Overview

- Weekly discussions graded by a certified instructor
- Challenges in the course reinforce concepts through practical exercises
- A realistic mock exam emulates the live exam
- Quizzes to test knowledge and practical challenges to gain real-world experience
- A final capstone project (with the exception of AWS Cloud Practitioner Course)
- Weekly sync sessions with the instructor and class are recommended but not mandatory
