

IT PROFESSIONAL APPRENTICESHIP PROGRAM

SkillStorm's IT Professional Apprenticeship Program is designed for transitioning service member (TSM) **without a degree or prior tech experience** and develop them into experienced IT professionals through our **36-month apprenticeship program**.

BUILDING U.S.-BASED TECH TEAMS

Once the TSM has completed training with SkillStorm, we develop them from an L1 help desk role to a certified, enterprise-level technologist. SkillStorm supports, mentors, trains and develops these TSMs while they gain real-world experience at the client's site.
